ABOUT INNOVATION RESTART CHATS (IRC)

In these difficult times of the COVID-19 outbreak, universities, schools, institutions and operators are trying to transform this critical emergency into an opportunity to promote and spread innovation at an educational and professional level.

Starting from the distance learning needs of our educational programs, we have developed a project that maintains its characteristics of interactivity and dialogue.

Initially designed for the students of the Master Degree in Management and Innovation (MAIN) of the Sant'Anna School of Advanced Studies, the **Innovation Restart Chats** is now a webinar series offered to alumni and friends of the Institute of Management. It will serve as a platform to help managers, students, and entrepreneurs to navigate these new normal times.

The success of the initiative has been made possible thanks to the support of Unione Industriale Pisana and the Task Force of the new Executive Master in Management and Innovation Design - MIND and its partner companies.

INNOVATION RESTART CHATS

The IRC is a webinar series coordinated by Alberto Di Minin and Andrea Tenucci, respectively the Director and the Vice-director of the new Executive Master in Management and Innovation Design.

OBJECTIVE

IRC is a journey through the best of Italian innovation. In each webinar, Alberto Di Minin and Andrea Tenucci interview a major player in international and Italian innovation, entrepreneurial and R&D scene.

Issues discussed:

- Technology transfer
- Entrepreneurship
- Industry 4.0
- Platform economy
- Finance for innovation
- Project & risk management
- And more
