Seasonal school
InnovACtion in health care: strategy, performance and data management
First edition

Target

This programme is designed for students (undergraduate, postgraduate and PHD) from various backgrounds who are interested in a future career in the field of data management, business and process reengineering, with a focus on health care. The programme allows ambitious young students to gain an introduction into the study of public service governace with a very practical approach based on case studies and innovative solution in the health care sector, considering also the recent pandemic events. This programme is a brilliant opportunity for participants to develop their experience of the subject in an inspiring academic environment.

TEACHING METHODOLOGIES

The IAC Seasonal School is a full online web-based programme. A mix of lecture-based and laboratory classes will be developed by professors and researchers. Participants will be actively engaged through a balanced mix of interactive theoretical lectures and simulations, debates and discussions on real case studies. Moreover, facilitators will be available in order to foster the interactions and improve the discussion during the lab classes. International and national researchers, managers and policy makers will join the discussion.
